

## Advaxis Issues Letter and Second Video Message to Stockholders Regarding Upcoming Special Meeting

November 24, 2021

*Company releases video message highlighting the need for all proposals to pass in order to consummate the proposed Biosight transaction*

*Advaxis urges stockholders to vote "FOR" all of the proposals at the special meeting in order to best position the company to build long term stockholder value*

MONMOUTH JUNCTION, N.J., Nov. 24, 2021 (GLOBE NEWSWIRE) -- Advaxis, Inc. (Nasdaq: ADXS), a clinical-stage biotechnology company focused on the development and commercialization of immunotherapy products, today issued the following statement to stockholders:

Dear Fellow Advaxis Stockholders:

I am writing to provide you with additional information and resources regarding the Company's proposed merger with Biosight. We believe that the proposed Biosight transaction can generate significant value for Advaxis stockholders. The combined company will be better capitalized and well-positioned to advance a broader portfolio of drug candidates aimed at addressing both liquid and solid tumors. The closing of the transaction is contingent upon, among other things, the approval of Advaxis' stockholders at the Special Meeting initially held on November 16, 2021 and adjourned to December 7, 2021.

Please go to the [Advaxis website](#) to watch the video entitled "Message About Proxy Proposal 2" we prepared to provide you with some additional information about the Biosight transaction and proxy proposal 2 to help inform your voting decision.

**In addition, two leading independent proxy advisory firms, Institutional Shareholder Services (ISS) and Glass Lewis & Co., have recommended that stockholders vote "FOR" all of the proposals at the special meeting. We strongly urge you to vote today in support of the merger and related proposals.**

### About Advaxis, Inc.

Advaxis, Inc. is a clinical-stage biotechnology company focused on the development and commercialization of proprietary *Lm*-based antigen delivery products. These immunotherapies are based on a platform technology that utilizes live attenuated *Listeria monocytogenes (Lm)* bioengineered to secrete antigen/adjuvant fusion proteins. These *Lm*-based strains are believed to be a significant advancement in immunotherapy as they integrate multiple functions into a single immunotherapy and are designed to access and direct antigen presenting cells to stimulate anti-tumor T cell immunity, activate the immune system with the equivalent of multiple adjuvants, and simultaneously reduce tumor protection in the tumor microenvironment to enable T cells to eliminate tumors.
